

Mid-Ulster & Fermanagh Information Sessions: March 2018 (Sessions 1-4)

A series of Information Sessions are taking place over the coming weeks to update the public about the construction of the SGN Natural Gas Network.

With the main construction phase currently underway, 220 subcontractors are working at key locations to bring natural gas to a total of eight towns in counties Tyrone, Fermanagh and Derry.

These informal drop-in sessions are an opportunity for the project team to engage directly with local residents and businesses in the Cookstown, Lisnaskea, Omagh and Enniskillen areas and to enable them to find out more about ongoing project development work in these local areas.

Members of the project team and the project contractors will be available at each of the events to answer any questions in relation to the project.
